To whom it may concern,

I am pleased to recommend Davi for any web development role or related position requiring a dedicated and forward-thinking professional. During the time that I worked with Davi, he consistently demonstrated a strong work ethic, technical competence, and excellent collaboration skills.

Davi is a developer who takes initiative and does not wait to be told what needs improvement. He proactively seeks opportunities to further build out features he has been assigned. Speaking from the UI/UX designer role, his input on new features, product improvements, and UI/UX considerations has repeatedly proven valuable. I can think of several occurrences where his suggestions directly contributed to more intuitive functionality, improved user experience, or correctly identified pitfalls in feature specs.

Communication with Davi has always been effortless and he is quite receptive to feedback. He maintained a frequent and open line of communication between me, himself and the team administration.

Most importantly, Davi is a hard worker who follows through. When given a task, he approaches it with focus, accountability, and attention to detail.

I highly recommend Davi for any web development or software engineering opportunity. He would be a strong addition to any company seeking a developer who is both skilled and great to work with. If you need further information, feel free to contact me.
