To Whom It May Concern,

I am writing on behalf of Davi Caamano, a senior full-stack software engineer who has been an invaluable asset to our engineering team at LegitScript. As team lead, I have worked closely with Davi and seen his contributions firsthand.

Davi is an exceptional team player. He communicates complex technical concepts clearly and approachably, and he is quick to support his colleagues, which makes him both a strong technical resource and a pleasure to work with.

What stands out most is the presence he brings to our meetings. Davi listens closely, asks the question that surfaces real constraints and consistently moves a stalled discussion toward a decision the team can act on. What gives that input its weight is his deep expertise in frontend development, which was in short supply when he joined the team. He stays current with the industry and has always made that knowledge available to the rest of the team as we built out front-end staffing.

I recommend Davi wholeheartedly for any role that draws on his skills and dedication. He has been an integral part of our team as we transitioned from Merchant Xray. Any organization would be fortunate to have him.

If you have any questions or would like more insight into Davi's work, please feel free to contact me.
